

**ADJURON, DE-201, TOTAL STATION**  
 measurements used in the preparation of this plat.  
 The field data upon which this plat is based has a closure precision of one (1) part in 250,000 feet and an angular error of 2.5" per station. The plat was adjusted using the **COLLAPSE** method.  
 This survey has been administered for closure and is found to be accurate within one foot in 250,000 feet.
